

AASHISH KUMAR SAINI

Software Engineer - Flutter & Cross-Platform Mobile Development
Delhi, 110094 | +91 8368259731 | aashishkumarsaini2000@gmail.com

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building cross-platform mobile applications, having shipped 20+ news apps across iOS and Android using Flutter. Skilled across Flutter, native iOS (SwiftUI/UIKit), and web-based TV app development, with hands-on experience owning features end-to-end and shipping them to production on the App Store and Play Store. Strong background in Firebase, GetX state management, custom Flutter plugin development, and Firebase-based app services including push notifications, deep linking, dynamic links, Crashlytics, and Analytics.

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, Dart, Swift, Kotlin

UI Frameworks: Flutter, UIKit, SwiftUI

State Management: GetX, BLOC

Web Technologies: HTML, CSS, JavaScript

Firebase & App Services: Firebase Cloud Messaging (Push Notifications), Deep Linking, Dynamic Links, Crashlytics, Firebase Analytics, Firestore

Database Management: MySQL, Firestore

Development Environments: Visual Studio Code, Xcode, Android Studio

Version Control Systems: Git, GitHub

AI Coding Assistants: Claude Code, Cursor, Codex, Copilot, ChatGPT

Core Competencies: Mobile Application Development, Cross-Platform Development, Native iOS/Android Development, TV App Development, UI/UX Design, Agile Methodologies

PROFESSIONAL EXPERIENCE

Software Engineer Jun 2023 - Aug 2026

Mediology Software Gurugram

- Developed and maintained Sortd, the company's core news SaaS platform, aligning development priorities with key business objectives.
- Built and maintained 20+ cross-platform news applications for iOS and Android using Flutter and the Flutter News Toolkit; released 30+ apps on the Google Play Store and 15+ on the Apple App Store.
- Designed and shipped a custom Flutter recommendation plugin that powers personalized content recommendations across the app portfolio.
- Implemented state management across the app portfolio using GetX and BLOC, structuring scalable, maintainable architecture for reactive, event-driven UI updates.
- Integrated push notifications (Firebase Cloud Messaging), deep linking, and Firebase Dynamic Links across the app portfolio to drive re-engagement and enable direct in-app navigation from external sources.
- Implemented Firebase Crashlytics and Firebase Analytics across apps to monitor crash-free rates, track user behavior, and inform data-driven product decisions.
- Built and maintained native iOS news applications in SwiftUI and UIKit over a 1-year period, including reusable in-house frameworks and Swift Package Manager (SPM) modules shared across multiple apps.
- Developed smart TV news applications using HTML, CSS, and JavaScript, optimizing layouts and navigation for TV-specific UI/UX and performance constraints.
- Optimized mobile application performance, architecture, and UI/UX across native Android and iOS news app components.
- Troubleshooted complex software issues, delivered timely resolutions, and documented processes for team knowledge sharing.

Technologies Used: Flutter, Dart, GetX, BLOC, SwiftUI, UIKit, Swift Package Manager, Firebase (Cloud Messaging, Dynamic Links, Crashlytics, Analytics), HTML/CSS/JS

Software Engineer InternDec 2022 - Jun 2023

Mediology SoftwareGurugram

- Contributed to Sortd Mobile, working on the development and enhancement of multiple production news applications, including Jansatta, Gujarat First, Punjabi Tribune, and Dainik Tribune, using Flutter.
- Built the Fintro Quiz App from scratch using Flutter, GetX state management, Google Login, and the Firebase Firestore database, and released it to production.
- Integrated push notifications, deep linking, and Firebase Analytics into production news apps to improve user re-engagement and enable actionable crash and usage insights.
- Designed clean, user-friendly UI/UX interfaces emphasizing usability principles across Android and iOS platforms.

Technologies Used: Flutter, GetX, Firebase Firestore, Firebase Cloud Messaging, Firebase Analytics, Google Login

PROJECTS

Fintro Quiz AppDec 2022 - Jun 2023

Quiz application built from scratch using Flutter, GetX state management, Google Login authentication, and a Firebase Firestore backend; designed and shipped end-to-end to production.

Calculator & Unit Converter AppJun 2023 - Jun2023

Calculator and unit converter app supporting mass, temperature, and length conversions, with Firebase Cloud Messaging, deep linking, Crashlytics, and Firebase Analytics integrated for push notifications, in-app navigation, crash monitoring, and usage tracking.

Cross-Platform News Applications (20+)Aug 2023 - Aug 2026

20+ production news apps for publications including Jansatta, Gujarat First, Punjabi Tribune, and Dainik Tribune, built with Flutter and the Flutter News Toolkit (30+ apps on Google Play, 15+ on the App Store), featuring a custom Flutter recommendation plugin, push notifications, deep linking, dynamic links, Crashlytics, and Analytics, with companion native iOS and smart TV versions.

EDUCATION

Bachelor of Technology (B.Tech)Graduated Dec 2023

KCC Institute of Technology & Management, Greater Noida | CGPA: 7.26 / 10

CERTIFICATIONS & ACHIEVEMENTS

Certifications: Java (Coding Ninjas), Python (Coursera - University of Michigan), Soft Skills (NPTEL), Industry 4.0 & IoT (NPTEL).

Problem Solving: Solved 200+ problems on LeetCode and HackerRank; 5-Star Coder in Problem Solving on HackerRank.
